## Distinguishing features.

A design that mirrors a new and refined style.

### DESIGN: MAKIO HASUIKE & CO

The central philosophy of Makio Hasuike's design is essentiality and harmony combined in a totally distinctive and innovative style. This can be seen in the elegant, rounded, soft lines of the new washing machines, in the unique door and detergent drawer design, in the shape of the control panel and in the other exclusive features.

Particular attention to product design aimed at obtaining solid, innovative, functional appliances is an Ariston tradition. The new 2011 collection is aimed at those who wish to be surrounded by distinctive, beautiful objects which add warmth and beauty to the home.

# AQUALTIS

With care technology  
For the wellbeing of all your clothes

# Distinguishing features.

## Better Ergonomics

In every detail the Ariston Aqualtis offers maximum comfort and extreme ease of use. Characterised by its extra large opening, the 35cm Porthole makes for easier loading of larger items. The raised and inclined drum means getting that last sock is no longer an issue. You don't need to bend down to access the drum as you would with traditional front loading washers.

## Super Silent

You'll hardly hear your Aqualtis at work. The Super Silent System, exclusive to Ariston, ensures maximum silence throughout the whole cycle. This is made possible by innovative cutting edge solutions: such as the specialized 3-phase motor, acoustic panels and the new intelligent pump system. As a result, the noise level is reduced and the quality of noise is improved.

## Delay Timer

It is possible to program your machine anytime throughout the day or night (up to 24 hours in advance) when it is more convenient for you, or when electricity costs less.

## Super Wash

Super Wash is the ideal solution to tackle particularly tough stains. Thanks to the Aqualtis' dynamic wash system it's capable of detecting precisely the quantity and type of laundry thereby determining the right balance of water, temperature and number of revolutions of the drum to give you an incredible wash result.

## Easy Iron

With the special 'Easy Iron' option Aqualtis is capable of choosing the best washing and spin conditions for the specific fabric. If the laundry is not unloaded immediately, the drum spins slowly and at regular intervals until it is turned off. This reduced the formation of creases to minimise the ironing process.

## Child Lock

Safety goes a step further with the Aqualtis. A separate button that locks the controls of the machine so accidental changes can't be made. Especially important when children are around.

## Woolmark

Woolmark Platinum Care: this exclusive cycle is more delicate and gentle than a hand wash. Wool has never been treated more gently. That's why it remains soft and fluffy after being washed and dried over and over again. The pure softness of your woollen garments is revitalized after every wash. You never have to wash by hand again. Wool has never been treated more gently.

## Jeans

A washing machine conceived for your favourite jeans, washing at 35 deg to protect colour and maintain the fit and structure of every type of denim garment. (Turn inside out before washing)

## Steam

The Aqualtis Steam Hygiene and Steam Refresh functions allow you to refresh your clothes while removing 99.9% of bacteria. We also have the exclusive perfume Bubbles so you can add your favourite scent during the cycle.

## Baby

The wash tackles typical baby stains and removes all traces of detergent, helping to protect delicate baby skin.

## Duvet

You don't need to take your feather duvets, quilts or padded anoraks to the Dry Cleaners any longer. The Aqualtis has a specific program for duvets. Thanks to this wash cycle, the garments are treated with the necessary care and with the right amount of water for a deep clean while caring for the fabric and quilting.

## Bed & Bath

A single load is enough to wash all bedding and towels for an entire family, saving time and power. For example, to wash a set of bedding and a few towels you need just a single washing cycle, whereas with a traditional washing machine you would need to do 2 wash loads.

## 30 Min Fast Wash

Refreshes lightly soiled garments quickly with excellent results. And by using the Time Save option in conjunction with the Fast Wash Option you can access a quick, efficient 15 minute refresh cycle.

## Time Save

An option for lightly soiled garments, the wash cycle duration will be reduced by 30% to 50%, depending on the selected cycle, thus saving on water and energy. Using this options allows cycle durations from 15 minutes depending on load size.

## Power Save

Aqualtis shuts off the stand-by power automatically after 30 minutes.

With the recent spike in Electricity costs we all want to save where we can. Aqualtis automatically shuts off the stand-by power after 30 minutes, making power saving easier than ever before. No more worrying about appliances standing idle wasting unnecessary power. And saving power means saving money. What could be better than that?

## Opens In Seconds

Easy open in seconds! At any stage during the cycle you can open the machine\*. Whether it's to add that last T-shirt, or to remove a stray red sock it's as simple as touching the pause button.

The larger 35cm porthole allows for easier loading of larger items. The raised drum is 5cm above most other major brands minimising the need to bend down.

## A More Intuitive Interface

The display is integrated into the door, and features new easier interaction logic. Working from left to right, the Aqualtis has a more methodical selection process. An in-depth study involving one million people around Europe allowed us to define the interface types that better respond to the demands of our consumers.

The LCD (Liquid Crystal Display) offers suggestions on the selection of the washing cycle and extra information on the cycles themselves, making programming easier. It has never been so easy!

The Digital display ensures all the functionality of high technology, but with ease of use.

The LED display has the style of a traditional interface, with the functionality of a higher specification model.

## Woolmark Platinum Care

Wool has never been treated more gently.

That's why it remains soft and fluffy after being washed and dried over and over again.

## A Safer Dispenser

With chemicals becoming more common in the home environment we aim to keep children safe by positioning the dispenser behind the door. Once the start button is pressed, the door lock means children can't access the dispenser.

This way there is no chance of an accidental poisoning.

## Comfort zone

Better ergonomic's with Aqualtis.

A raised and inclined drum makes for easier viewing into the drum, along with the large 35cm porthole for simple loading and unloading of larger items. Who knew using a front loader could be so easy?

## Quick and Easy

When you only have a small load, use the Time Save option in connection with your usual cycle, to get the same wash results while saving time and energy.

## New Perfume Bubbles

Add a touch of your favourite perfume to your garments using the innovative Perfume "Bubbles".

Perfect for asthma or allergy sufferers who can't put it directly on the skin, or if you simply want a lasting fragrance all day.

\*Available exclusively with the Steam function

## Steam Bath

Refreshing your clothes and removing 99.99% of bacteria while doing so.

## Silence Therapy

You'll hardly hear your Aqualtis at work.

The Super Silent System, exclusive to Ariston, ensures maximum silence throughout the whole cycle.

## A range of programs

In addition to the traditional programs, Aqualtis offers a new range of specialized cycles and options, to guarantee just the right programs for every fabric.

## Eco Tech

With Ariston Eco Tech the focus is also on wash times, and most importantly, the wash result.

Adjusting the time and the wash action will result in the same result each time even though the load composition will be unique.

## Easy Open Door

Opens at your command without having to wait. Whether you want to add that last sock, or remove a stray item, Aqualtis makes it possible.

# Aqualtis introduces the new Dryer & Combo Machines

New additions to the Aqualtis family are a Condenser Dryer and a Washer / Dryer Combo unit.

Packed full of features to rival any other brand on the market, we offer user friendly appliances that suit any lifestyle.

## Condenser Dryer

- 16 dry programs including the highly desirable "Woolmark Silver Care" wool cycle look after the fabric of your garments better than ever before.
- Drain away feature means you never need to worry about emptying the tank again. Simply use the supplied hose to drain away waste water.
- Large 8kg capacity equivalent to most of the Aqualtis range makes washing and drying large items or loads easier with no separating or sorting required.

## Washer / Dryer Combo

No space? No worries. With the new Combo option you can now wash and dry using the one appliance, making this a perfect option if you have limited laundry space.

Ariston offers you a large capacity washer packed full of all the innovative Aqualtis features, with the added functionality of being able to dry as well.

Thanks to the more advanced and sophisticated technology, Ariston is even closer to your desires with its new washer dryer. Gone are the times when it was necessary to wash and dry your laundry in two separate loads, wasting time and energy. Ariston reacts to your desires and its technology fulfils them.

## Wash and Dry up to 5.5Kg

The Ariston washer dryer can wash and dry 5.5kg of laundry in one process, saving you the hassle of having to wash and dry in two separate loads. Once again, Ariston's innovations are everything you have come to expect.

## One Hour Wash & Dry

Convenience with Aqualtis

60 Minutes is all it takes to wash and dry lightly soiled garments.

This specially designed program will wash and dry 1KG of clothes in only 1 hour.

# Ariston washer dryer

The best in technology  
at your service

Thanks to the more advanced and sophisticated technology, Ariston is even closer to your needs with its new washer dryer. Gone are the times when it was necessary to wash and dry your laundry in two separate loads, wasting time and energy. Ariston reacts to your requirements, and its technology fulfils them.

## Wash and Dry up to 4.5Kg

The Ariston washer dryer opens new horizons. It is able to wash and dry 4.5 kg of laundry in one process, sparing you the trouble of having to wash and dry in two separate loads. This is made possible by a 'thermo-centrifuge' phase that extracts a significant percentage of water during the drying phase and a series of sensors able to keep the temperature steady. Once again, Ariston's innovations are everything you have come to expect.

## Particular care in washing wool

Like the Ariston washing machines, the new washer dryer also boasts of the Woolmark Company certification for the care of all woollen items declared 'hand wash only'. In fact, with the Woolmark Platinum Care program, standards of excellence defined for the care of the most delicate items have been attained.
