

DAILY REFERENCE GUIDE

THANK YOU FOR PURCHASING AN ARISTON PRODUCT

To receive more comprehensive help and support, please register your product at www.aristonchannel.com

You can download the Safety Instructions and the Use and Care Guide by visiting our website www.aristonchannel.com and following the instructions on the back of this booklet.

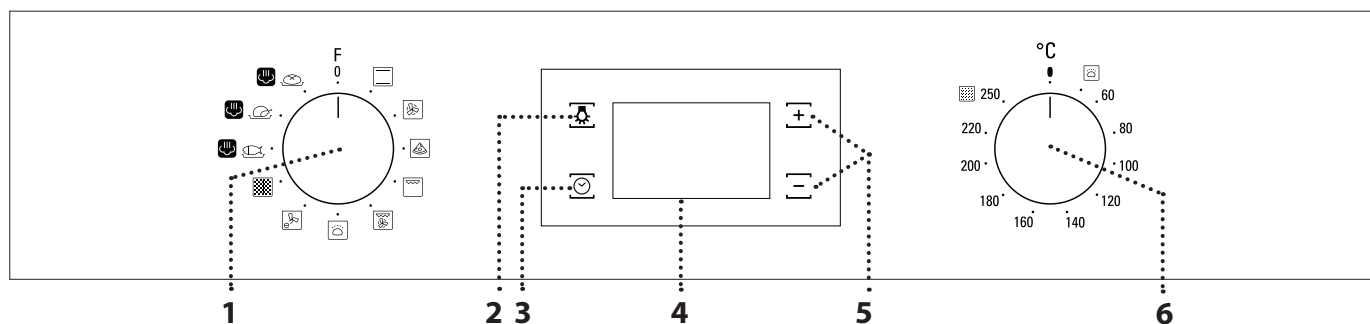

Before using the appliance carefully read the Health and Safety guide.

PRODUCT DESCRIPTION

1. Control panel
2. Fan
3. Lamp
4. Shelf guides (the level is indicated on the wall of the cooking compartment)
5. Door
6. Door lock (locks the door while automatic cleaning is in progress and afterwards)
7. Upper heating element/grill
8. Circular heating element (not visible)
9. Identification plate (do not remove)
10. steam-embossing for drinking water

CONTROL PANEL DESCRIPTION

1. SELECTION KNOB

For switching the oven on by selecting a function. Turn to the 0 position to switch the oven off.

2. LIGHT

With the oven switched on, press  to turn the oven compartment lamp on or off.

3. SETTING THE TIME

For accessing the cooking time settings, delayed start and timer. For displaying the time when the oven is off.

4. DISPLAY

5. ADJUSTMENT BUTTONS

For changing the cooking time settings.

6. THERMOSTAT KNOB

Turn to select the temperature you require when activating manual functions.

ACCESSORIES

WIRE SHELF

Use to cook food or as a support for pans, cake tins and other ovenproof items of cookware.

DRIP TRAY *

Use as an oven tray for cooking meat, fish, vegetables, focaccia, etc. or position underneath the wire shelf to collect cooking juices.

BAKING TRAY *

Use for cooking all bread and pastry products, but also for roasts, fish en papillote, etc.

SLIDING RUNNERS *

To facilitate inserting or removing accessories.

* Available only on certain models

The number and the type of accessories may vary depending on which model is purchased.

Other accessories can be purchased separately from the After-sales Service.

INSERTING THE WIRE SHELF AND OTHER ACCESSORIES

. Insert the wire shelf onto the level you require by holding it tilted slightly upwards and resting the raised rear side (pointing upwards) down first. Then slide it horizontally along the runners as far as possible.

. Other accessories, like the baking tray, are to be inserted horizontally, letting them slide on the runners.

REMOVING AND REFITTING THE SHELF GUIDES

. To remove the shelf guides, firmly grip the external part of the guide, and pull it towards you to extract the support and the two internal pins from the lodging.

. To reposition the shelf guides, position them near the cavity and initially insert the two pins into their lodgings. Next, position the external part near its lodging, insert the support, and firmly press towards the wall of the cavity to make sure the shelf guide is properly secured.

FITTING THE SLIDING RUNNERS (IF PRESENT)

Remove the shelf guides. Disengage the guide's anchoring clips from the shelf guide, starting from the lower part.

To reinstall the sliding guides, anchor the guide's upper clip to the shelf guide, then lower the other clip into position. To secure the guide, press the lower portion of the clip firmly against the shelf guide. Make sure that the runners can move freely. Reposition the shelf guides.

Please note: The sliding runners can be fitted on any level.

FUNCTIONS

 **CONVENTIONAL**
For cooking any kind of dish on one shelf only.

 **FORCED AIR**
For cooking different foods that require the same cooking temperature on several shelves (maximum three) at the same time. This function can be used to cook different foods without odours being transferred from one food to another.

 **PIZZA**
For baking different types and sizes of pizza and bread. It is a good idea to swap the position of the baking trays halfway through cooking.

 **GRILL**
For grilling steaks, kebabs and sausages, cooking vegetables au gratin or toasting bread. When grilling meat, we recommend using a dripping pan to collect the cooking juices: position the pan on any of the levels below the wire shelf and add 200 ml of drinking water.

 **TURBO GRILL**
For roasting large joints of meat (legs, roast beef, chicken). We recommend using a dripping pan to collect the cooking juices: position the pan on any of the levels below the wire shelf and add 200 ml of drinking water.

 **RISING**
For helping sweet or savoury dough to rise effectively. Turn the *thermostat knob* to the icon to activate this function.

 **ECO FORCED AIR**
For cooking roasts and stuffed roasting joints on a single shelf. Food is prevented from drying out excessively by gentle, intermittent air circulation. When this ECO function is in use, the light will remain switched off during cooking but can be switched on again by pressing .

 **AUTOMATIC CLEANING - PYRO**
For eliminating cooking spatters using a cycle at very high temperature (over 400 °C).

steam 

- **FISH** 
- **MEAT** 
- **BREAD** 

The steam  functions provide excellent results thanks to the addition of steam in cooking cycles. Only when the oven is cold, pour drinking water on the bottom of the oven and select the specific function for your preparation. The optimal water quantities and temperatures for each food category are listed in the relative cooking table. **Do not preheat the oven before inserting food.**

FIRST TIME USE

1. SETTING THE TIME

You will need to set the time when you switch on the appliance for the first time: Press  until the  icon and the two digits for the hour start flashing on the display.

Use  or  to set the hour and press  to confirm. The two digits for the minutes will start flashing. Use  or  to set the minutes and press  to confirm.

Please note: When the  icon is flashing, for example following lengthy power outages, you will need to reset the time.

2. SET THE POWER CONSUMPTION

The oven is programmed to work at a power of less than 2.9 kW ("Lo"): To operate the oven at a power that is compatible with a domestic power supply of greater than 3 kW ("Hi"), you will need to change the settings.

To go to the change menu, turn the *selection knob* to , then turn it back to **0**.

Press and hold  and  for five seconds immediately afterwards.

Use  or  to change the setting, then press and hold  for at least two seconds to confirm.

3. HEAT THE OVEN

A new oven may release odours that have been left behind during manufacturing: this is completely normal.

Before starting to cook food, we therefore recommend heating the oven with it empty in order to remove any possible odours.

Remove any protective cardboard or transparent film from the oven and remove any accessories from inside it.

Heat the oven to 250 °C for about one hour. The oven must be empty during this time.

Please note: It is advisable to air the room after using the appliance for the first time.

DAILY USE

1. SELECT A FUNCTION

To select a function, turn the *selection knob* to the symbol for the function you require: the display will light up and an audible signal will sound.

2. ACTIVATE A FUNCTION

MANUAL

To start the function you have selected, turn the *thermostat knob* to set the temperature you require.

Please note: During cooking you can change the function by turning the *selection knob* or adjust the temperature by turning the *thermostat knob*. The function will not start if the *thermostat knob* will be on 0. You can set the cooking time, cooking end time (only if you set a cooking time) and a timer.

RISING

To start the "Rising" function, turn the *thermostat knob* to the relevant symbol; if the oven is set to a different temperature, the function will not start.

Please note: You can set the cooking time, cooking end time (only if you set a cooking time) and a timer.

steam

Only when the oven is cold, fill the embossing of the cavity with the quantity of drinking water suggested in the relative cooking table. Place the food in the oven.

Set and activate the steam function: At the end, carefully open the door and let steam escape slowly.

Please note: During steam cooking, do not open the door and never top up the water.

3. PREHEATING AND RESIDUAL HEAT

Once the function starts, an audible signal and a flashing icon on the display indicate that the preheating phase is active.

When the set temperature has been reached, the icon becomes fixed and a new audible signal will sound to indicate that the food can be placed inside and cooking can proceed.

Please note: Placing food in the oven before the preheating phase has finished may have an adverse effect on the final result of cooking.

After cooking and with the function deactivated, the icon may continue to remain visible on the display even after the cooling fan has switched off to indicate

that there is residual heat in the compartment.

Please note: The time after which the icon switches off varies because it depends on a series of factors such as ambient temperature and function used. In any case, the product should be considered to be off when the pointer on the selection knob is at "0".

PROGRAMMING COOKING

You will need to select a function before you can start programming cooking.

DURATION

Keep pressing until the icon and "00:00" start flashing on the display.

Use + or - to set the cooking time you require, then press to confirm.

Activate the function by turning the *thermostat knob* to the temperature you require: an audible signal will sound and the display will indicate that cooking is complete.

Please note: To cancel the cooking time you have set, keep pressing until the icon starts flashing on the display, then use - to reset the cooking time to "00:00". This cooking time includes a preheating phase.

PROGRAMMING THE END COOKING TIME/ DELAYED START

After a cooking time has been set, starting the function can be delayed by programming its end time: press until the icon and the current time start flashing on the display.

Use + or - to set the time you want cooking to end and press to confirm.

Activate the function by turning the *thermostat knob* to the temperature you require: the function will remain paused until it starts automatically after the period of time that has been calculated in order for cooking to finish at the time you have set.

Please note: To cancel the setting, switch the oven off by turning the *selection knob* to the 0 position.

END OF COOKING

An audible signal will sound and the display will indicate that the function has finished.

Turn the *selection knob* to select a different function or to 0 to switch the oven off.

Please note: If the timer is active, the display will show "END"

alternately with the remaining time.

. SETTING THE TIMER

This option does not interrupt or program cooking but allows you to use the display as a timer, either during while a function is active or when the oven is off.

Keep pressing  until the  and "00:00" icon and "00:00" start flashing on the display.

Use  or  to set the time you require and press  to confirm. An audible signal will sound once the timer has finished counting down the selected time.

Notes: To cancel the timer, keep pressing  until the  icon starts flashing, then use  to reset the time to "00:00".

. AUTOMATIC CLEANING FUNCTION – PYRO

Do not touch the oven during the Pyro cycle. Keep children and animals away from the oven during and after (until the room has finished airing) running the Pyro cycle.

Remove all accessories - including shelf guides - from the oven before activating the function. If the oven is installed below a hob, make sure that all the burners or electric hotplates are switched off while running the selfcleaning cycle.

For optimum cleaning results, remove the worst soiling with a damp sponge before using the Pyro function.

Avoid activating the pyro cycle cleaning in the presence of limescale residues.

We recommend only running the Pyro function if the appliance contains heavy soiling or gives off bad odours during cooking.

To activate the automatic cleaning function, turn the *selection knob* and the *thermostat knob* to the  icon. The function will be activated automatically, the door locked and the light inside the oven switched off: The display will show the time remaining to the end, alternating with "Pyro".

Once the cycle has been completed, the door remains locked until the temperature inside the oven has returned to a safe level. Air the room during and after running the Pyro cycle.

COOKING TABLE

RECIPE	FUNCTION	PREHEAT	TEMPERATURE (°C)	DURATION (Min)	LEVEL AND ACCESSORIES
Leavened cakes		Yes	170	30 - 50	3 
		Yes	160	30 - 50	2

CLEANING AND MAINTENANCE

Make sure that the oven has cooled down before carrying out any maintenance or cleaning. Do not use steam cleaners.

Do not use wire wool, abrasive scourers or abrasive/corrosive cleaning agents, as these could damage the surfaces of the appliance.

Wear protective gloves. The oven must be disconnected from the mains before carrying out any kind of maintenance work.

EXTERIOR SURFACES

Clean the surfaces with a damp microfibre cloth. If they are very dirty, add a few drops of pH-neutral detergent. Finish off with a dry cloth.

Do not use corrosive or abrasive detergents. If any of these products inadvertently comes into contact with the surfaces of the appliance, clean immediately with a damp microfibre cloth.

INTERIOR SURFACES

• After every use, leave the oven to cool and then clean it, preferably while it is still warm, to remove any deposits or stains caused by food residues. To dry any condensation that has formed as a result of cooking foods with a high water content, leave the oven to cool completely and then wipe it with a cloth or sponge.

• To remove the remaining limescale from the bottom of the cavity after the steam cooking, just pour 250 ml of white vinegar onto the embossing of the cavity (alternatively, use a specific descaling product. For

availability please contact the After Sales Service). Leave it to work at room temperature for 30 minutes, then clean the cavity with warm drinking water and a soft cloth. Cleaning is recommended at least for every 5 to 10 steam cooking cycles.

• If there is stubborn dirt on the interior surfaces, we recommend running the automatic cleaning function for optimal cleaning results. Avoid activating the pyrolytic cycle cleaning in the presence of limescale residues. Before activating, perform limescale cleaning as described above.

• The door can be easily removed and refitted to facilitate cleaning of the glass.

• Clean the glass in the door with a suitable liquid detergent.

ACCESSORIES

Soak the accessories in a washing-up liquid solution after use, handling them with oven gloves if they are still hot. Food residues can be removed using a washing-up brush or a sponge.

REMOVING AND REFITTING THE DOOR

1. To remove the door, open it fully and lower the catches until they are in the unlock position.

2. Close the door as much as you can. Take a firm hold of the door with both hands – do not hold it by the handle. Simply remove the door by continuing to close it while pulling it upwards at the same time until it is

released from its seating. Put the door to one side, resting it on a soft surface.

3. Refit the door by moving it towards the oven, aligning the hooks of the hinges with their seating and securing the upper part onto its seating.

4. Lower the door and then open it fully. Lower the catches into their original position: Make sure that you lower them down completely.

Apply gentle pressure to check that the catches are in the correct position.

5. Try closing the door and check to make sure that it lines up with the control panel. If it does not, repeat the steps above: The door could become damaged if it does not work properly.

REPLACING THE LAMP

1. Disconnect the oven from the power supply.
2. Unscrew the cover from the light, replace the bulb and screw the cover back on the light.
3. Reconnect the oven to the power supply.

Please note: Use 25 W/230 V type G9, T300 °C halogen lamps. The bulb used in the product is specifically designed for domestic appliances and is not suitable for general room lighting within the home (EC Regulation 244/2009).

Light bulbs are available from our After-sales Service. - Do not handle bulbs with your bare hands as your fingerprints could damage them. Do not use the oven until the light cover has been refitted.

CLICK & CLEAN - CLEANING THE GLASSES

1. After removing the door and resting it on a soft surface with the handle downwards, simultaneously press the two retaining clips and remove the upper edge of the door by pulling it towards you.

2. Lift and firmly hold the inner glass with both hands, remove it and place it on a soft surface before cleaning it.

3. Refit the intermediate pane (marked with "1R") before refitting the inside pane: To position the panes of glass correctly, make sure that the "R" mark can be seen in the left-hand corner. First insert the long side of the glass marked "R" into the support seats, then lower it into position. Repeat this procedure for both panes of glass.

4. Refit the upper edge: A click will indicate correct positioning. Make sure the seal is secure before refitting the door.

TROUBLESHOOTING

PROBLEM	POSSIBLE CAUSE	SOLUTION
The oven is not working.	Power cut. Disconnection from the mains.	Check for the presence of mains electrical power and whether the oven is connected to the electricity supply. Turn off the oven and restart it to see if the fault persists.
The display shows the letter "F" followed by a number or letter.	Oven failure.	Contact your nearest Client After-sales Service Centre and state the number following the letter "F".
The display is showing the message "Hot" and the selected function will not start.	Temperature too high.	Allow the oven to cool down before activating the function. Select a different function.
