SPECIAL FEATURES

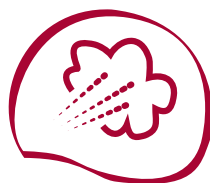

WOOLMARK PLATINUM CARE

The Woolmark Apparel Care Green logo provides the same laundering assurances for garments specifying “hand wash” in their care instructions and also indicates that a product delivers water and energy efficiencies, minimising the consumption of resources.

STEAM REFRESH

Steam hygiene is an option available with select washing programme (even at low temperature. At the end of the washing cycle the steam is generated and injected directly into the drum eliminating 99.99% of bacteria without using unhealthy chemical additives. Steam refresh reduces a huge part of creases making garments easier to iron.

ECO RAIN FEATURE

If you're looking for a machine that's as kind to the environment as it is to your clothes, the Eco Rain technology makes it the perfect choice. Eco Rain is a feature we've added where clothes are sprayed with water during the rinse phase saving up to 20% in water and 50% in energy. Simply put, Eco Rain is like giving your clothes a shower instead of a bath

EASY DOOR OPEN

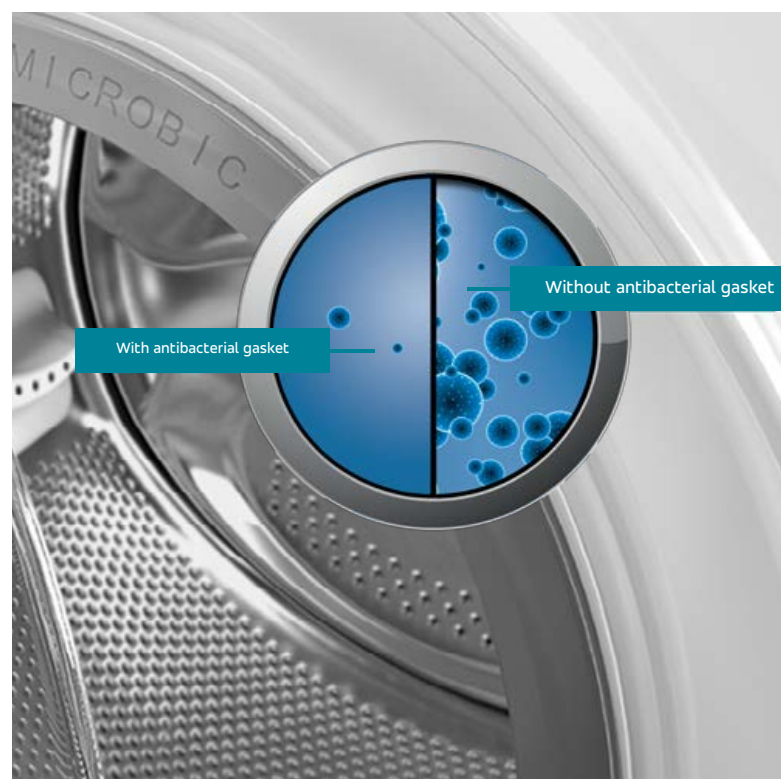

Door unlocks within seconds allowing you to open the door at any stage of the cycle, so when you forget that T-shirt or sock it's as simple as touching the pause button.

ANTI MOULD

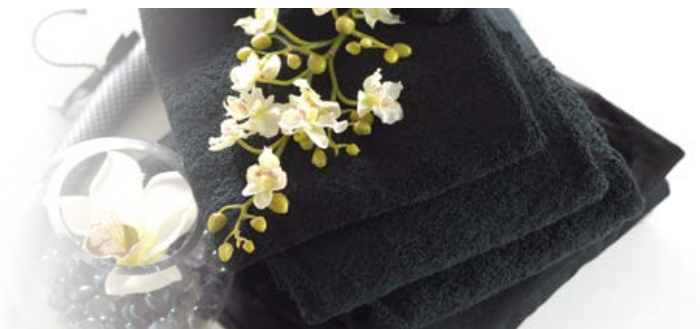

Special antibacterial treated gasket. Reducing bacteria proliferation by up to 99.9%.

WHITES CYCLE

We take care of your white fabrics by washing them fully to avoid yellowing. For white and brightly coloured fabrics you can rely on Ariston technology.

DARKS CYCLE

Ariston knows that black and dark garments can be affected by high wash temperatures. The darks cycle is set at the correct temperature and wash action to ensure that the garments' depth of colour is well retained.

ULTRA DELICATE CYCLE

Now it is possible to wash the most delicate fabrics without damaging the fibres. Garments with sequins or Swarovski are treated with a set program that protects delicate fibres, cleaning softly and removing dirt effectively.

LCD DISPLAY

The easy-to-read LCD offers an easy interaction with your machine.

TITANIUM INNER DRUM

Ariston washing machines have a sturdy titanium drum that is built to last.

COLOURED CYCLE

Ariston washers and washer-dryers maintain perfect colours wash after wash. Ariston provides advanced technical features which take care of your fabrics; assuring focused treatment to whites, light coloured and dark coloured fabrics to preserve their colour over time.

ECO WASH

A GESTURE OF CONCERN FOR THE ENVIRONMENT

Eco Cycles: Protecting the environment and its resources also depends on customer awareness. For this reason Ariston has equipped its machines with Eco wash cycles. Thanks to Eco cycles, you can save 50% of the energy used in a normal cycle.

-64%

ECO COTTON cycle can save you 64% of energy compared to a cotton cycle at 30°

-52%

SYNTHETICS eco cycle can save you up to 52% compared to a normal cycle

-65%

ECO RAPID 30° cycle is perfect if you want a quick wash that is energy efficient saving you 65% of energy compared to the mixed cycle

DEEP ANTI-ALLERGY ACTION

Important studies have shown that more and more people are suffering from allergies. Smog, mites and pollens are mainly responsible for annoying skin conditions that affect one in four people, especially children.

Our washing machine and washer-dryers offer a specific program that keeps main allergens to a minimum, by washing deeply without damaging fabrics. The cycle is based on two phases:

Phase 1: Warming the water at the start to maintain a constant temperature, followed by a higher temperature to remove pollens and mites.

Phase 2: With five rinse phases, we have more rinses to ensure all detergent is removed, allowing you to enjoy the comfort you deserve.

STEAM REFRESH

Using natural power for fresher, cleaner clothes, Steam Hygiene adds an extra hit of steam at the end of a full wash cycle for a deep, intensive clean. Removing 99.9% of bacteria and reducing allergens, it's perfect for sensitive skin. Can also be used as a separate cycle to refresh items such as cushions and toys.

PLATINUM WOOL CARE

Certified soft and gentle for hand-wash woollen items, this delicate wash programme uses an extra gentle drum action and low spin speeds to reduce friction and deterioration caused by clothes rubbing together. Delicately caring, it helps to keep your knits looking – and feeling – beautiful for longer.

AQUALTIS range

HIGH DEFINITION TECHNOLOGY & DESIGN

Aqualtis High Definition clean and drying philosophy is based on solid technological and innovative designs. The central philosophy of design comes from our award winning designer Makio Hasuike. Makio Hasuike's design aim is harmony in terms of aesthetics and functionality; Makio particularly pays attention to his product design which is focused on obtaining solid, innovative, functional appliances that add warmth and beauty to every home.

Ariston high definition technology & design philosophy is shown by the excellent treatment of laundry items by our washing machines and tumble dryer. Aqualtis High Definition clean and drying extends fibre life and leaves fabrics clean, soft and in perfect shape.

DESIGNER
MAKIO HASUIKE

Feature unique to Aqualtis range

DIRECT INJECTION TECHNOLOGY

Right from the first minutes, the exclusive pre-mixing Direct Injection Technology transforms the detergent into a mousse with 60% more cleaning power than a traditional washing machine, which is then injected right in the heart of the wash. In this way, high washing temperatures are not required anymore to get outstanding cleaning performances so at only 20° you can have the same results of 40° avoiding colour alteration*.

*Tested by an independent institute

ARCADIA RANGE

EASY IRON

This optional wash and spin cycle will be modified in order to reduce the formation of creases.

At the end of the cycle the washing machine drum will rotate slowly so you don't need to worry about ironing.

MIX 15' CYCLE

This program allows you to refresh in just 15 minutes any kind of garment up to 1.5KG of load capacity.

MIX 30' CYCLE

A very fast program designed to care for your clothes of any fabric, by refreshing them in 30 minutes at 30°C to get the best results. Suitable for loads up to 3KG.

THE BEST IN TECHNOLOGY AT YOUR SERVICE

Thanks to the more advanced and sophisticated technology, Ariston is even closer to your needs with its new washer dryer. Gone are the times when it was necessary to wash and dry your laundry in two separate loads, wasting time and energy. Ariston reacts to your requirements, and its technology fulfils them.

WASH AND DRY UP TO 4.5KG

The Ariston washer dryer opens new horizons. It is able to wash and dry 4.5 kg of laundry in one process, sparing you the trouble of having to wash and dry in two separate loads. This is made possible by a 'thermo-centrifuge' phase that extracts a significant percentage of water during the drying phase and a series of sensors able to keep the temperature steady. Once again, Ariston's innovations are everything you have come to expect.

WOOLMARK: PARTICULAR CARE IN WASHING WOOL

Like the Ariston washing machines, the new washer dryer also boasts of the Woolmark Company certification for the care of all woollen items declared 'hand wash only'.

This exclusive cycle is more delicate and gentle than a hand wash. The pure softness of your woollen garments is revitalized after every wash. You never have to wash by hand again. Wool has never been treated more gently.

That's why it remains soft and fluffy after being washed and dried over and over again.
