MWA25B

Microwave & Grill

Dynamic Crisp: Only possible through 3D Emission system – allowing perfectly even browning on top and bottom. A special Crisp plate made of ferrite (a type of rubber) heats up extremely fast (210° within 2 min.) Crisp Plate is heated up by lower MW inlet – turning it virtually into a frying pan. The quartz grill is responsible for browning the top of food surface fast and evenly. The upper MW inlet speeds up the cooking of the food on the plate. Turntable rotation, Grill power and MW power must be perfectly synchronized in order to have proper balance of baking, rising and browning.

Technical Specifications:

Technical Specifications

Voltage (V)	240
Frequency (Hz)	50
Absorbed Current (A)	8A
Type of energy	Electric
Absorbed Power (W)	1750
Maximum Microwave Power	800W
Grill	900W
Cavity Capacity (Net)	25 ltr
Plug and lead	10 AMP
Ventilation type	Front Ventilation
Height of the product	310
Depth of the product	458
Width of the product	520
Gross Product weight (kg)	17.86
